

AIA Nevada Distinguished Service Awards

2023 Emerging Professionals Leadership Award Application | Wellbe Bartsma AIA, NCARB, LEED AP BD+C

Wellbe Bartsma is a licensed architect and project designer at Gensler's Las Vegas office with experience in a variety of project types: hospitality, office buildings, workplace, retail, education, mixed-use, residential, and urban design. Wellbe has worked with many Gensler offices. This has allowed him to advance his knowledge of building design in different markets as well as more technical skills of building in different climates. He is an instrumental part of the design team from the initial visualization process through construction. As a core member of the team, Wellbe is heavily involved in client meetings, presentations, as well as holding client relationships.

Growing up in rural Washington state, Wellbe was raised on a farm, miles outside of the nearest town. Knowing he wanted to be an architect from an early age, he has always had a wanderlust to travel to any city and explore. He attended Washington State University and obtained a Bachelor of Science in Architectural Studies with a Minor in Construction Management in May of 2011. With a strong passion for urban design and tall buildings, he moved to Chicago and obtained his Master of Architecture from Illinois Institute of Technology in May of 2013. During his graduate program, he studied diligently under Professor Peter Land on wide-span and tall-building design, with an emphasis on wind's effects on building shape and how buildings can be oriented and shaped to harness the wind's energy.

Following his graduation from IIT, Wellbe moved to Las Vegas to pursue his career and interest in hospitality design. He started working as an Architectural Project Coordinator for Steelman Partners, through 2017. Following Steelman Partners, he moved on to Gensler's Las Vegas office as a Technical Designer. In Fall of 2019 he was promoted to an Associate at Gensler which gave him vision into leadership discussions and brought mentorship opportunities to junior designers.

Wellbe passed all his Architecture Registration Exams and became a Registered Architect in the state of Nevada in June 2019, also holding his NCARB certificate. He is passionate about sustainability in the built environment and has worked as part of the Gensler Cities Climate Challenge (GC3), an initiative whose goal is to eliminate all net emissions associated with Gensler's work by 2030. He strives to make more of an environmental impact in his work and obtained his LEED AP BD+C accreditation in July of 2020.

During his time at Gensler, he volunteered to chair the gFit committee, devoted to promoting health and wellbeing in and around the workplace. This included planning Wellbeing Awareness Week, focused on events and education: encouraging taking walking breaks, eating healthy, connecting with the outdoors, ergonomics in the workplace, etc. He has grown into a leader at Gensler, helping lead the offices recruitment and hiring endeavors, as well as leads a weekly business development call with the companies regional leaders in all practice areas, helping to provide strategic solutions to increase Genslers local presence in Las Vegas. He has also been entrusted as the offices Design Experience leader, one of Genslers five Design Synergy nodes which helps promote Genslers design talent, culture, and experimentation.

Gensler has taken part as a mentorship partner for the AIA High School Design Competition, of which Wellbe serves as a mentor and assists in judging. He also exposed students at a local urban high school to the field of architecture by presenting design projects he was involved with and taking questions about the field of design. Wellbe's volunteer experience also includes working as a 'Big Brother' in the Big Brothers Big Sisters of Southern Nevada program from 2014-2015.

Based on his passion for the development and future growth of Las Vegas, Wellbe brought the opportunity for Gensler to join the Downtown Vegas Alliance to office leadership. He currently serves as the liaison between Gensler and the Alliance during these events. He has a keen interest in the architectural community and loves meeting new people in the city, making connections as well as connecting others in our industry. He can often be seen at other industry events, such as Network of Executive Women in Hospitality (NEWH), now coined as the Hospitality Industry Network, and the International Interior Design Association (IIDA) to name a few.

Wellbe is actively involved in the American Institute of Architects. He has served as the AIA Las Vegas Emerging Professionals Director for the last year, helping further promote and connect those in the profession among the community by starting a Firm Crawl series at local firms. These events have been well received and many future 'crawls' are already scheduled due to the success. Other events include local site visits of projects under construction. The site visits are open to all in the industry, but still gathers the interest of students and professionals alike, serving as a great networking opportunity and connecting those of all ages and experience in our city. In March, Wellbe planned the monthly AIA meeting in conjunction with the American Society of Landscape Architects (ASLA) for an enjoyable evening to celebrate Landscape Architecture month.

He has also served as the Young Architect Representative for Nevada for 2023, of which Wellbe has worked closely with other representatives from other states to promote advocacy in the profession, and just started the Emerging Professional Friendly Firm Recognition Survey, which will help firms in Nevada be recognized for empowering young professionals. Wellbe was just recently appointed to AIA Nevada Strategic Council set to begin in 2024, of which he will continue to help make a difference and bring ideas to the larger stage in efforts to further improve the architecture profession. He looks forward to further professional growth, dovetailed with promotion of the architectural industry in the years to come.

Thank you to the AIA Nevada and the Distinguished Service Awards committee for the consideration of this award. I strive constantly for my professional growth as well as looking for ways to continue growing my involvement in the Las Vegas community.

EDUCATION

Illinois Institute of Technology Chicago, IL
Master of Architecture
May 2013

Washington State University Pullman, WA
Bachelor of Science in Architectural Studies
Minor in Construction Management
May 2011

PROFESSIONAL EXPERIENCE

Gensler Las Vegas, NV

Associate | Architect

08/2017 - Current

- Worked closely with multiple Gensler offices on projects, assisting them with all phases of design on a variety of project types
- Design Experience Synergy leader in the office, designing through people's mindsets, behaviors, emotions, and desires.
- Heavily involved in client meetings, presentations, as well as holding client relationships and business development efforts
- Create and develop overall design concepts, formulating design presentation strategies, and providing creative process leadership to ensure designs support project goals
- Perform all phases of design, FF&E selection, and coordination with associated parties

Steelman Partners Las Vegas, NV

Architectural Project Coordinator

09/2013 - 08/2017

- Assisted in running projects from concept through the construction document phase
- Participate in client meetings and present design ideas
- Worked within a collaborative team environment, achieving high quality final products

I AM AIA LAS VEGAS MEMBER SPOTLIGHT

I Am A Member Of The American Institute Of Architects (AIA) Because... I want to connect with like-minded professionals who share related goals and interests in our community and beyond! AIA gives us the common ground to come together and learn from one another. I see so much potential for Las Vegas and I want to do my part to help further improve the city, helping it become a staple sustainable community in the desert.

I attended Washington State University (Go Cougs!) to obtain my undergraduate degree, but then having a strong passion for urban design and tall buildings, I moved to Chicago and obtained my Master of Architecture from the Illinois Institute of Technology (IIT). Having been in Las Vegas for over nine years, it's now the city I'm proud to call home. Being a part of Gensler for over five years, and as an Associate, I get the chance to collaborate with great talent every day in not only our Las Vegas office but offices worldwide.

I am very excited to be taking on the role of the AIA Las Vegas Emerging Professionals Director for the upcoming term. I have always had a strong interest in the architectural community and love meeting new people in the city. I look forward to further promote our profession among the community, make connections as well as connecting others in our industry. Next year, EPYAF will be focusing on increasing career development including project tours, firm crawls, network events and more. We also plan to coincide some of these events with the local AIAS chapter at UNLV, where we can encourage leadership not only among young architects, but emerging and future architects currently working on their degrees or licensure. I want to help connect young architects in Las Vegas through our common goal of achieving design excellence.

As with many people, I'd like to think my past has helped mold me into who I am today. Being brought up on a farm in central Washington state, I learned the value of good work ethic, teamwork, and how important it is to meet deadlines at an early age. When the crops are ready, they're READY and you better be quick to get everything harvested by the time that thundercloud approaches. I knew I wanted to be an architect from an early age and always had a wanderlust to travel to any city and explore. Coming from the wide-open fields and walking into a dense urban environment was a whole other world for me, and I wanted to be a part of it! Now that I'm a licensed architect, I enjoy coming into work every day and collaborating with amazing talent to help better our built environment. I now work on amazing projects inside and outside of Las Vegas, focusing on urban and tall building design, master planning, and hospitality design. When I'm not working away, one of my favorite things to do is do yardwork and landscaping in my backyard. As my dad likes to say, 'You can take the boy out of the farm, but you can't take the farm out of the boy.'

What is the most important thing you've learned? Be Confident! A little confidence goes a long way when you are creating, presenting to clients, or really anything in life! I'll be honest when I say I have times of self-doubt when a certain task gets too hard. I've learned to step away, go for a walk and take a breather to try and clear my mind. Upon approaching the task again, I almost always have a clear direction or path ahead. Confidence helps us keep going if things don't quite work out the first time, and it helps us move forward with new opportunities. Always believe in yourself and you'll be surprised at what you can achieve!

What is your favorite piece of architecture? Why? The John Hancock Center in Chicago. The way the structure of the tower is expressed on the perimeter and the tapering of the tower that help brace the tower against the wind loads is fascinating to me. It's such a powerful building when you're in its presence, and to think how revolutionary it was during its construction in the 1960's, yet still such a great statement today shows how timeless it is.

What person, living or dead, would you most like to talk with? Relating to our industry, I would have to say my thesis professor from IIT, Peter Land. He really challenged me, and I believe I learned some of the most valuable insights to design from him. His studio focused on sustainable long-span and high-rise architecture, believing that architects need to address renewable resources and energy conservation in a world where fossil fuels are diminishing. He would always gladly take the time to sit and have conversations about design, his experiences and we would explore methods in which our studio projects could harvest energy to be self-sufficient. I was saddened to hear of his passing in 2020.

How do you think the profession will evolve in the next 5-10 years? Resiliency in design and construction will be more important in the next few years. We all keep hearing about renewable energy and finding sustainable ways to power our buildings, but it will become more important to find ways to achieve carbon neutrality. We can only truly achieve this if we remove the embodied carbon used in constructing buildings, as well as the emissions related to using buildings.

WELLBE BARTSMA, AIA

In March, the Emerging Professionals / Young Architects Forum Committee held our first event, the first Firm Tour of many, dubbing the series to be named the Firm Crawl. The event was held at TSK Architects. A healthy mix of Architects, Allie Members, as well as AIAS members were in attendance. The event and the series was well received and everyone was looking forward to more events like this in the future.

THE FIRST IN THE BI-MONTHLY EPYAF FIRM CRAWL SERIES VISITS TSK ARCHITECTS

The EPYAF Committee is sponsored by

Wellbe Bartsma, AIA, Chair of the EPYAF Committee welcomes the attendees.

This month we kicked off the first event of our bi-monthly Firm Crawl Series. We visited TSK Architects, an international planning and design firm with over 60 years of experience. With a successful turn out, we started the evening off with food, drinks, and networking. In addition to many TSK attendees, we had a mix of architect and designers from other firms, allied members, as well as many UNLV students. The TSK team took our group around their office, showing projects, many wood display models of passed projects that had been made in their design lab, and then finished the evening by presenting three of their current projects with us. We are excited to keep this momentum going as we start planning our next firm crawl, to be held in May at Cunningham Group! Don't miss these opportunities to learn more about the firms in our area, meet their teams, and network with other like-minded professionals!

Jeffrey Sarmiento, AIA tells the attendees about TSK and starts them on their tour.

EP/YAF FIRM CRAWL SERIES

Thank you to Cunningham for hosting us 5/31 for our second firm crawl!

In May, we held our second Firm Crawl at Cunningham Architects. This event was well received and had an even larger turnout than before. A great mix of Allied Members attended as well which served for good introductions and discussion.

EMERGING PROFESSIONALS & YOUNG ARCHITECTS FORUM

In partnership with A4LE, the EPYAF took a tour of the newly built Northeast Career & Technical Academy on 9/21.

Thank you to CCSD and TSK for hosting us! We are also looking forward to the next installment of our Firm Crawl series at NOVUS Architecture + Interiors on Thursday, October 5th! This is a great opportunity for the EPYAF community, as well as other members who are interested in meeting their team, viewing their portfolio, and meeting other design professionals in a casual setting.

In September we held our first site visit at the Northeast Career & Technical Academy in conjunction with A4LE. There was a great turnout as it was brought to my attention that many AIA members want more project visits.

In July, we held our third Firm Crawl at Carpenter Sellers Del Gatto Architects. It was our best attended event of the year with over 30 people in attendance.

EP/YAF FIRM CRAWL SERIES RECAP

COUNTY REHAB CENTER Las Vegas, Nevada

Gensler

DROP OFF AND ROTUNDA

Client: Clark County

Project Status: Concept Design

Project Description: Design of a new rehabilitation center for Clark County. The goals of the center are to create a community of care and recovery while establishing organizational clarity, instilling dignity at all levels with a welcoming and belonging to all. The center consists of a total of 240 beds divided between detox, 30 day stay, 90 day stay, and 6 month stay, as well as a wellness/renewal center, welcome and family center, admin, building support, and a dining and multi-purpose center with outdoor amenities.

Companies Role in Project: Design and Project Architect

Role in Project: Project Designer and Project Architect

- Assisted in design and coordinated presentations as well as held client meetings to present design updates
- Developed design to promote investigation of all pathways to recovery. With an approach rooted in personal focused care.
- Designed with a goal to build resilience in all who come here for care by re-igniting a direction of hope and purpose.
- Led design on the interior lobby and welcome center.
- Run multiple coordination calls with the client to ensure all goals are met, and presented designs to the Clark County Board of Commissioners.

SITE PLAN

VISITOR CENTER INTERIOR

OCEAN PARK RESORT Hallandale, Florida

Gensler

RESORT AERIAL

Client: Confidential Client

Project Status: Schematic Design

Project Description: A 35-acre mixed-use entertainment development in Hallandale, FL combines a four-star, 250-key hotel and casino with a best-in-class ocean park. At the heart of the 9-acre park lies a 650-feet long wave pool, which will serve as the main attraction for visitors. The park also will feature a variety of other water attractions to complement the aquatic program. The complex has been designed to seamlessly integrate the gaming and hospitality program with the ocean park, with the intent of creating a cohesive and immersive experience for visitors.

Companies Role: Design Architect

Role in Project: Project Designer and Project Architect

- Design and Masterplan options for weekly meetings with client and land use attorneys.
- Coordinated with waterpark consultant to develop and plan waterpark components.
- Integrated a gaming and hospitality program, inclusive of a hotel component, creating a cohesive and immersive experience for visitors.
- Performed numerous master plan studies to fit desired program within the site parameters, coordinating with traffic engineers to develop a new street system within the property.
- Led client coordination meetings to develop hotel program and hotel planning from early concept development through schematic design.

SITE PLAN

WATER PARK

INTEGRATED RESORT Las Vegas, Nevada

Gensler

RESORT VIEW

Client: Gladehaven Development

Project Status: Schematic Design

Project Description: Concept and massing studies for an integrated resort on a 9 acre site.

Companies Role: Design Architect

Role in Project: Project Designer and Project Architect

- Design and Masterplan integrated resort development.
- Integrated a gaming and hospitality program, inclusive of a four-star hotel, creating a cohesive and immersive experience for visitors, while maximizing amenities and usable square footage.
- Performed numerous master plan studies to present and review with the client.
- Study ways in which to enhance the human experience of this resort by connecting guests to multiple amenities vertically and horizontally through the property.
- Brought natural light into the interiors through strategic openings in the hotel tower and skylights to gaming and retail levels below, connecting the guests with the natural elements.

SITE PLAN

POOL DECK

CONFIDENTIAL OFFICE Las Vegas, Nevada

Gensler

MAIN OFFICE ENTRY

Client: Confidential Client

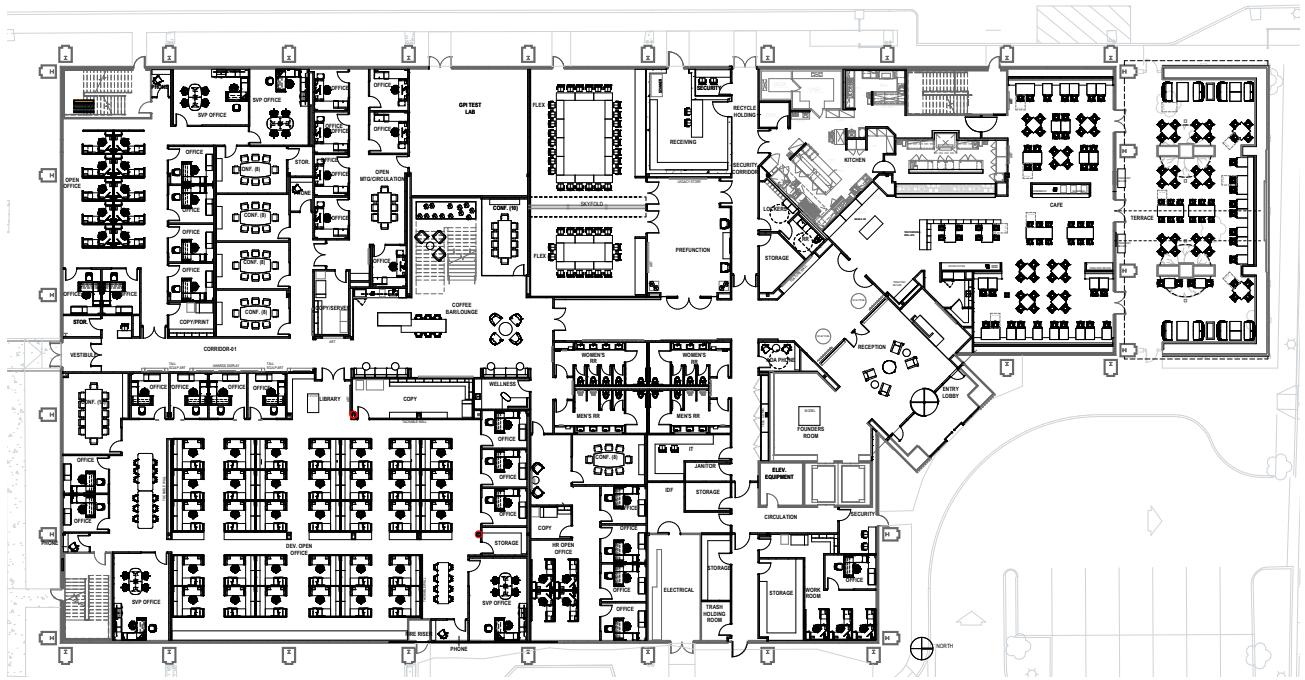

Project Status: Built

Project Description: Renovation of an existing 2 level office building and parking garage for a new company headquarters.

Companies Role: Design Architect and Architect of Record

Role in Project: Project Architect

- Existing two story office building interiors renovation including core and shell updates, tenant improvement of interior spaces, outdoor terrace addition, and parking garage updates.
- Performed numerous space planning and test fit studies to fit required amount of desks and offices in departments, ultimately resulting in the most efficient layout given the existing conditions of the building.
- Selected and detailed skylight system to fit within and align with existing structural elements.
- Took part in client meetings, coordinated with consultants, and managed internal team to meet project deliverables.
- Assisted in selection of colors and finishes for exterior refresh and detailed new office entry facade.

LEVEL 01 FLOOR PLAN LAYOUT

EXECUTIVE OFFICE

STARBUCKS Las Vegas, Nevada

Steelman Partners

STARBUCKS

Client: Silverton Hotel and Casino

Project Status: Built

Project Description: Full design and construction of a new ground up Starbucks property at the new Silverton Village retail center.

Companies Role: Design Architect and Architect of Record

Role in Project: Project Designer and Project Manager

- Aided in design, coordinated presentations, as well as assist in generating 3D renderings.
- Conduct meeting between the client, contractor, Starbucks Coffee Company, and consultants.
- Prepare documents from schematic design, design development, and construction documents.
- Developed the conceptual design for Blaze Pizza and Firehouse Subs retail buildings.
- Select materials and finishes for exterior and interior applications.

STARBUCKS PLAN

STARBUCKS INTERIORS

AIA Las Vegas

Dear Distinguished Service Awards Jury,

It is my privilege to nominate Wellbe Bartsma for the Emerging Professionals Leadership Award. Throughout his career, Wellbe has demonstrated exceptional leadership, initiative, and dedication to the architectural community. His resume highlights his commitment to advancing the architectural profession and improving design through volunteer service.

In his current role as Emerging Professionals/Young Architects Forum (EP/YAF) Director, Wellbe has spearheaded efforts to foster inclusivity and connections within our industry. When he took on this position, he noticed a lack of community among young architects, especially those looking to network and make professional contacts. To remedy this, he created the EP/YAF Firm Crawl series – a program that opens architecture firm doors to AIA members, offering an inside look at their design process, portfolio, and team. Wellbe believes that although firms may compete for business, the community should support one another. The series has successfully built camaraderie between firms and provided a space to share ideas. When we invite new graduates or members pursuing licensure, these events have helped them discover their professional passions, whether in hospitality, healthcare, education, residential, or other architectural specialties, by connecting them with experienced architects working in those fields. This program will continue under his direction next year thanks to his leadership.

Beyond his AIA service, Wellbe has a heart for helping those in need. His commitment to organizations like Big Brothers Big Sisters and Three Square demonstrates his compassion. Professionally, Wellbe is a skilled architect capable of achieving excellence on complex projects. Most importantly, he is a kind and principled person. His creativity and dedication make him a great addition to any team. I cannot imagine a more worthy recipient of this award than Wellbe.

It is my sincere hope that the jury recognizes how exceptional Wellbe is and chooses to honor him. Please reach out to me if I can provide additional support for his nomination. He has my highest recommendation.

Regards,

Taryn Kole

Subject: Wellbe Bartsma, AIA, NCARB, LEED AP BD+C
AIA Nevada EP Leadership Award

It is a pleasure to write this letter of recommendation on behalf of Wellbe Bartsma for the AIA Emerging Professionals Leadership Award. I have had the opportunity of working with Wellbe for the past six years with Gensler and have been his Coach for part of that time. I have seen the changes in his professional growth, both creatively and in leadership.

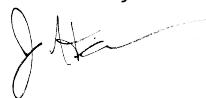

Wellbe is eager and willing to jump into any project. He is sought after for this ability to take on projects from concept through construction documents, delivering successful results. His solutions are elegant, highly original, technologically challenging and worked out in detail. The uniqueness and originality of his work contributes to project success. His work represents elements that promote healthy lifestyles and creates a welcoming sense of place. From early in the design process, he envisions how projects can best embody sustainable values, material and design choices that reflect the local culture and climate. He also works closely with the client to deliver cost effective end results.

He is a young professional, who is a pleasure to work with and understands the importance of a team. He collaborates and partners with his peers, those he mentors, and management in his own unique style, always making sure that everyone always feel included. Wellbe is seen in our office as a mentor that people turn to for advice and help with projects. He successfully leads teams to success through tight project deadlines and uses his talents to truly uplift the experience through design.

He is energetic and productive in his efforts, which he undertakes with professionalism, responsibility and intelligence and works hard with focus. Wellbe strives to learn something new daily not only about design but all aspects of the architecture business. He has also taken on initiatives of his own to strengthen his ties in the community. He is a growing leader in business development and building strong client relationships, further growing Gensler's presence in Nevada. On top of beginning to bring in clients, Wellbe also has been leading recruitment efforts, helping ensure that we bring in the top talent to grow our office.

I am pleased to have the opportunity to very highly recommend Wellbe Bartsma for the AIA Nevada Emerging Professionals Leadership Award. I am confident that he would be a qualified candidate and much deserving of this award. Please feel free to contact me if any more information is required 702.893.2834.

Yours Sincerely,

Janie Horas

Gensler

Dear Selection Committee,

I am delighted to submit a nomination for the Emerging Professionals Leadership Award on behalf of Wellbe Bartsma, a talented and dedicated licensed architect and project designer at Gensler's Las Vegas office. Wellbe's outstanding contributions to the field of architecture, his commitment to sustainability, mentorship, and community involvement, and his exceptional portfolio of projects make him an excellent candidate for this prestigious recognition.

Wellbe Bartsma's career at Gensler's Las Vegas office has been marked by his versatility, excellence, and unwavering passion for design. He has had the opportunity to work on a wide range of project types, including hospitality, office buildings, workplace, retail, education, mixed-use, residential, and urban design. This diverse experience has not only honed his architectural skills but also allowed him to make a significant impact on a variety of communities through his work.

Wellbe's commitment to sustainability in the built environment is a testament to his forward-thinking and responsible approach to architecture. He consistently incorporates sustainable design principles into his projects, promoting environmentally conscious solutions and inspiring others to do the same. His dedication to sustainability aligns perfectly with the values and priorities of the architectural profession and Gensler's firmwide goals.

In addition to his professional achievements, Wellbe is a remarkable mentor both within our office and in the community. He generously shares his knowledge and experience with younger architects, fostering their growth and nurturing the next generation of design professionals. Wellbe has helped to lead events for the AIA Emerging Professionals, which have been very well attended with many expressing their excitement for future annual events. His involvement in the AIA High School Design Competition and his service on the AIA Las Vegas Board demonstrate his commitment to shaping the future of architecture and advancing the profession.

Wellbe's contributions have not gone unnoticed, as evidenced by his feature in the AIA Forum Newsletter. This recognition is a testament to his influence and leadership within the architectural community, further solidifying his impact and reputation.

Wellbe has been involved in projects not only across Nevada but also throughout the United States and even in Asia. His global perspective and collaborative approach have enriched the architectural landscape in various regions, showcasing his ability to adapt to diverse contexts and design challenges.

Beyond his professional commitments, Wellbe regularly engages with charitable organizations, demonstrating his dedication to giving back to the community. He takes the lead in organizing and encouraging our office's participation in community service initiatives, inspiring his colleagues to join him in making a positive impact on society.

In conclusion, Wellbe Bartsma's exceptional contributions to architecture, his unwavering dedication to sustainability, his mentorship and community involvement, his recognition by the AIA Forum Newsletter, and his extensive project portfolio make him an outstanding candidate for the Emerging Professionals Leadership Award. I wholeheartedly recommend Wellbe for this prestigious recognition, and I believe his continued dedication to the field will serve as an inspiration to architects and aspiring architects worldwide.

Thank you for considering Wellbe Bartsma for this esteemed award. If you require any additional information or documentation to support this nomination, please do not hesitate to contact me.

Sincerely,

Trisha Litzau, Marketing Manager, Gensler
